Contents Volume 199

LEON JAY GLESER (West Lafayette, Indiana), MICHAEL D. PERLMAN (Seattle, Washington), S. JAMES PRESS (Riverside, California), AND ALLAN R. SAMPSON (Pittsburgh, Pennsylvania)
A Brief Biography and Appreciation of Ingram Olkin 1

T. ANDO (Sapporo, Japan)
Majorizations and Inequalities in Matrix Theory 17

Y. L. TONG (Atlanta, Georgia)
Some Recent Developments on Majorization Inequalities in Probability and Statistics 69

KARL MOSLER (Hamburg, Germany)
Majorization in Economic Disparity Measures 91

JAMES V. BONDAR (Ottawa, Ontario, Canada)
Comments on and Complements to: *Inequalities: Theory of Majorization and Its Applications*, by Albert W. Marshall and Ingram Olkin 115

HECTOR F. MIRANDA AND ROBERT C. THOMPSON (Santa Barbara, California)
Group Majorization, the Convex Hulls of Sets of Matrices and the Diagonal Element—Singular Value Inequalities. 131

KHAKIM D. IKRAMOV (Waterloo, Ontario, Canada)
A Simple Proof of the Generalized Schur Inequality. 143

STEEN A. ANDERSSON (Bloomington, Indiana) AND MICHAEL D. PERLMAN (Seattle, Washington)
A Characterization of Matrix Groups That Act Transitively on the Cone of Positive Definite Matrices 151

MARKUS ABT (Augsburg, Germany)
A Note on the Product Correlation Rule 171

SRINIVASA R. ARIKATI AND URI N. PELED (Chicago, Illinois)
Degree Sequences and Majorization 179

BERTHOLD HEILIGERS (Augsburg, Germany)
Totally Nonnegative Moment Matrices 213

J. FERRER, Mª I. GARCÍA, AND F. PUERTA (Barcelona, Spain)
Differentiable Families of Subspaces 229

Mª ASUNCIÓN BEITIA AND JUAN M. GRACIA (Vitoria-Gasteiz, Spain)
Local Behavior of Sylvester Matrix Equations Related to Block Similarity 253

R. B. BAPAT AND SUBHASH C. KOCHAR (New Delhi, India)
On Likelihood-Ratio Ordering of Order Statistics 281

B. MOND AND J. E. PEČARIĆ (Bundoora, Victoria, Australia)
Inequalities Involving Powers of Generalized Inverses 293

JIANMING MIAO AND ADI BEN-ISRAEL (New Brunswick, New Jersey)
On l_p-Approximate Solutions of Linear Equations 305

S. W. DRURY (Montreal, Quebec, Canada)
A Bound for the Determinant of Certain Hadamard Products and for the Determinant of the Sum of Two Normal Matrices 329

INGO ALTHÖFER (Bielefeld, Germany)
On Sparse Approximations to Randomized Strategies and Convex Combinations 339

H. K. WIMMER (Würzburg, Germany)
Roth's Theorems for Matrix Equations With Symmetry Constraints 357

M. KNOTT AND C. S. SMITH (London, England)
On a Generalization of Cyclic Monotonicity and Distances Among Random Vectors 363

ALAN HOFFMAN (Yorktown Heights, New York) AND URIEL G. ROTHBLUM (Haifa, Israel)
A Proof of the Convexity of the Range of a Nonatomic Vector Measure Using Linear Inequalities 373

RUSSELL MERRIS (Hayward, California)
Degree Maximal Graphs Are Laplacian Integral 381

S. W. DRURY (Montreal, Quebec, Canada)
On a Theorem of Wielandt and the Compounds of Unitary Matrices 391

XIAO-LI MENG (Chicago, Illinois) AND DONALD B. RUBIN (Cambridge, Massachusetts)
On the Global and Componentwise Rates of Convergence of the EM Algorithm 413

RAFAEL BRU, JUANA CERDÁN, AND ANA M. URBANO (Valencia, Spain)
An Algorithm for the Multiinput Pole Assignment Problem 427

AUTHOR INDEX 445
